12. The Accused Products allow images to be compressed in various digital formats.

The Accused Products also allow images to be captured along with transaction data, such that the images and the transaction data can be stored and later retrieved for examination. The Accused Products also include motion detection functionality that compares two digitized images to measure the extent of change from the first image to the second. If the extent of change is greater than a reference value, then the second image is saved. Later the saved images can be retrieved for examination.

13. Nuvico tests, demonstrates and provides training on how to operate the Accused Products in the United States. For example, Nuvico routinely participates in industry trade shows

such as the ISC West trade show held every year in Las Vegas, Nevada. At this trade show, Nuvico has displayed one or more of the Accused Products and has provided demonstrations of the various functions and features of those products, including the motion detection feature. Upon information and belief, Nuvico routinely tests the Accused Products in the United States to verify that the products operate as they are designed and intended.

Nuvico's Knowledge of the '345 and '346 Patents

Further, the EyzOn Camera, together with the IRIS DVS and IRIS Total Vision products, were publicly displayed at the 2013 ISC West trade show and convention in Las Vegas in May of 2013. Nuvico was also an exhibitor at that same trade show. Upon information and belief, employees or representatives from Nuvico visited the booth where the IRIS and EyzOn products, and a copy of the '345 and '346 Patents were being displayed.

15. The '345 Patent has been cited as prior art with respect to at least 13 patent applications considered by the PTO. More significantly, the '346 Patent has been cited as prior art with respect to 68 patent applications.
